

 [Guatemala's Dominican Youth Movement](http://www.mjdguatemala.org) has completed the first part of the project in which they take part along with the **Dominican Sisters of the Annunciation of the Blessed Virgin.**

This project consists of helping the children from the Francisco Coll School, located in the outskirts of the zone 3 dump in their town. This area is quite dangerous and that was what led them to help the School, as they want a better country and the best way to make it develop is helping the new Guatemalan generations.

Given the place where the School is located, the first phase involved fencing the playground and the School with electric wire, in order to give them more security.

After this first stage, we are analysing the second one, consisting of cleaning of the playground and painting the School area with the children, and the third one, involving the reconstruction of one of the classrooms.
